

LADIES
APRON

Tailored Comfort

Stay safe and comfortable while caring for your clients with the Silverback Ladies Apron.

Tailored specifically for the female frame, with a neater waist cut and custom leg design, these aprons provide back support and enhanced protection with a 5.75mm layer of DNA impact foam.

A breathable, water repellent finish and 90% cotton construction align with a support system that is 15% lighter to ensure ease of movement, while the bi-lateral fastening system helps you find the perfect fit.

Innovative abdominal sling and additional dorsal support for the best core support system on the market

Neater waist design for comfort and ease of fitment

Bi-lateral fastening system for the perfect fit every time

Four knife pockets to keep all your tools easily accessible

DNA impact foam protection for shock absorption and comfort

15% lighter support system

90% cotton fabric for breathability with water repellent heavy duty chrome leather protection

Size	Waist	Length	Code
XS	28-30 inches (approx 71-76cm)	30 inches (approx 76cm)	SBACXS
S	32-34 inches (approx 81-86cm)	30 inches (approx 76cm)	SBACS

Premium Protection From All Angles

What Makes The Silverback Ladies Apron Different To The Men's?

In terms of functionality, there is no difference between the men's and women's versions of the Silverback Apron. Both will keep you comfortable and safer while caring for your clients, with a strong protective layer and breathable yet water repellent construction. The key differences are that the Silverback Ladies Apron support system is approximately 15% lighter, and the cut of the apron “appreciate[s] those curves in all the right places” as per the Silverback site.
